PLUMBING PERMIT

*Note: A separate permit is required for each and every building or structure on which work is to be done. If building contains more than (1) unit, list addresses of all units in which work will be done.

All permits expire 6 months after the last required inspection that has been passed, or 6 months after the date of issue if no required inspections have been approved. The Building Official may issue a 6 month extension of any permit, (for due cause), if requested in writing by the permit holder prior to such a permit expiring.

***** Re-inspection Fees: \$50.00 each Occurrence *****

Work Commencing Without a Permit: Where any work for which a permit is required is started without such a permit having been issued, the applicable fees shall be doubled. (This includes permits for Building, Electrical, Plumbing, Mechanical, Gas etc.) The payment of such a double fee shall not relieve any persons from fully complying with the requirements of all applicable codes and City Ordinances including on work already performed, concealed or otherwise not inspected, nor shall it relieve them from any other penalties as may be prescribed by law.

I hereby certify that I have read and examined this document and know the same to be true and correct. All provisions of laws and ordinances governing this type of work will be complied with whether specified herein or not. Granting of a permit does not presume to give authority to violate or cancel the provisions of any other state or local law regulating construction or the performance of construction. Furthermore, I certify that I have the permission of the property owner(s) to perform work on their property.
