

## **Academy and Carnes Street Improvements**

This project will consist of stormwater upgrades, repaving, sidewalk revisions, and lighting upgrades. Improvements will be similar to those just completed on Dallas Street. Traffic will be restricted to residents only. All other traffic will be detoured. Construction is scheduled to begin in approximately two weeks, and excluding any unexpected delays should be completed by February 2009. All residents along Academy Street (Main to Dixie) and Carnes Street (Academy to Morningside) who have not signed a temporary construction easement are urged to do so. These easements allow the City to make necessary connections to your driveways and walks as elevation revisions and sidewalk contours will be revised in the project. If these temporary easements are not signed, access improvements to some properties will become the responsibility of the property owner. To schedule a time to review and sign a temporary access easement, please contact Mr. Dale Harris, Project Manager, and Acworth Public Works at 770-975-0679.
